Table of Contents

Standard Guidelines for the Design of Urban Stormwater Systems

Foreword
Acknowledgments
1.0 Scope
2.0 Definitions
3.0 Site Analysis
   3.1 Basic Requirements
      3.1.1 Topography
      3.1.2 Geography
      3.1.3 Water Table
      3.1.4 Geology
      3.1.5 Water Source
      3.1.6 Soil Information
      3.1.7 Environmental Factors
      3.1.8 Physical Constraints

4.0 Hydrology
   4.1 Quantity
      4.1.1 Design Points and Return Periods
      4.1.2 Runoff Determination Methods
      4.1.3 Design Rainfall
      4.1.4 Rainfall Abstraction
      4.1.5 Runoff Hydrographs
      4.1.6 Rational Method
      4.1.7 Time of Concentration
      4.1.8 Hydrograph
      4.1.9 Calibration
      4.1.10 Historical Information

   4.2 Water Quality
      4.2.1 Pollutant Sources
      4.2.2 Water Quality Impacts
      4.3 Rainfall Runoff Computer Models

5.0 Nonstructural Considerations
   5.1 Floodplains
   5.2 Wetlands
   5.3 Forests and Riparian Buffers
   5.4 Stream Bank Assessment
   5.5 Site Planning

6.0 System Configuration
   6.1 Collection System Types

Standard Guidelines for the Design, Installation, Maintenance and Operation of Urban Stormwater Systems,
ASCE/EWRI 45-, 46-, 47-05

American Society of Civil Engineers, 1801 Alexander Bell Drive, Reston, VA 20191 USA
Phone: 1-800-548-ASCE (2723) or 1-703-295-6300 Fax: 1-703-295-6211 Internet: www.pubs.asce.org
6.1.1. Pipes or Conduits
6.1.2. Inlet Structures
6.1.3. Drainage Ways
6.1.4. Streets
6.1.5. Flow Controls
6.1.6. Retention/Detention Facilities

6.2. Special Structures
6.2.1. Pumping Stations
6.2.2. Vaults
6.2.3. Manholes
6.2.4. Cleanouts
6.2.5. Equipment Access Shafts

6.3. Applications
6.3.1. Location Requirements
6.3.2. Site Restrictions

7.0 Hydraulic Design
7.1. Hydraulic Principles
7.1.1. Flow Classification
7.1.2. Bernoulli Theorem: Conservation of Energy
7.1.3. Conservation of Momentum
7.1.4. Conservation of Mass

7.2. Elements of Hydraulic Analysis
7.2.1. Normal Depth
7.2.2. Water Surface Profile Classification.
7.2.3. Hydraulic Jump
7.2.4. Hydraulic Head Losses Due to Friction
7.2.5. Minor Losses

7.3. Hydraulic Structures
7.3.1. Stormwater Inlets
7.3.2. Culverts
7.3.3. Bridges
7.3.4. Spillways and Drop Structures
7.3.5. Energy Dissipation and Outlet Structures
7.3.6. Pumps

7.4. Hydraulic Analysis Procedures
7.5. Flood Routing
7.5.1. Muskingum Method or the Kinematic Wave Technique
7.5.2. Modified Kinematic Wave Routing Method
7.5.3. Modified Puls Method

7.6. Computer Models

8.0. Structural Design of Stormwater Systems
8.1. Loading
8.1.1. Dead Loads
8.1.2. Live Loads
8.1.3. Construction Loads
8.1.4. Jacking Loads
8.1.5. Other Load

8.2. Embedment

8.3. Pipe and Culvert Structural Requirements
8.3.1. Concrete Pipe
4.1 Surface Features
4.2 Subsurface Features
4.2.1 Utilities
4.2.2 Geologic Conditions.

5.0 CONSTRUCTION

5.1 Safety
5.2 Soil Erosion and Sediment Control
5.3 Site Preparation
5.4 Materials Receiving, Handling, and Storage
5.5 Line and Grade
5.6 Excavation
5.6.1 Excavation Limits
5.6.2 Handling of Excavated Material
5.6.3 Sheathing and Shoring
  5.6.3.1 Trench Boxes with Subtrench
  5.6.3.2 Trench Boxes without Subtrench
5.6.4 Dewatering
5.7 Foundation Preparation

5.8 Placement of Drainage Materials

5.8.1 Pipe

5.8.2 Geocomposite Drainage Materials

5.8.3 Other Drainage Materials

5.9 Backfill

5.10 Site Restoration

6.0 INSPECTION

6.1 Inspection of Materials

6.1.1 Prefabricated and/or Premanufactured Components

6.1.2 Bedding, Backfill, and Envelope Materials

6.1.3 Storage of Materials

6.2 Inspection of Equipment

6.2.1 Safety

6.2.2 Suitability and/or Conformance

6.3 Inspection of Construction

6.3.1 Sequencing

6.3.2 Construction Layout

6.3.3 Excavation and Dewatering

6.3.4 Construction

6.3.5 Backfilling

6.3.6 Televising

6.3.7 Testing
6.4 Acceptance of Construction
6.5 Recording Observations
6.6 Record Drawings

7.0 REFERENCES

APPENDICES
I Inspector’s Checklist for Preliminary Inspection Activities
II Inspector’s Checklist for Construction Procedures

Standard Guidelines for the Operation and Maintenance of Urban Stormwater Systems
Foreword
Acknowledgements

1.0 SCOPE
2.0 DEFINITIONS

3.0 OPERATION AND MAINTENANCE PLAN
  3.1 Scope
  3.2 Responsibilities
  3.3 Design Criteria
  3.4 Scheduled Procedures
  3.5 Unscheduled Operating Procedures
    3.5.1 Line Blockage
    3.5.2 Control Structure Blockage
    3.5.3 Manholes and Catch Basin Blockage
    3.5.4 Other Urban Stormwater System Components
  3.6 Preventive Maintenance Procedures
    3.6.1 Checklists
    3.6.2 Annual System Inspections
  3.7 Safety
    3.7.1 Structures
    3.7.2 Mechanical
    3.7.3 Electrical
    3.7.4 Underground Procedures
    3.7.5 Other Safety Considerations
4.0 WATER QUALITY
   4.1 Environmental Indicators
   4.2 Water Quality Standards

5.0 PERIODIC INSPECTION
   5.1 Underground Safety
   5.2 Inspection
      5.2.1 Closed Conduits
      5.2.2 Open Channels
      5.2.3 Manholes and Confluence Structures
      5.2.4 Catch Basins
      5.2.5 Retention/Detention Ponds
      5.2.6 Major Structures
      5.2.7 Flapgates
      5.2.8 Pump Stations

6.0 MAINTENANCE
   6.1 Cleaning
   6.2 Electrical
   6.3 Mechanical
   6.4 Repair
   6.5 Rehabilitation
   6.6 Safety

7.0 REFERENCES
