Contents

Forensic Engineering Practice (Practitioner Track)

Validity and Reliability of Forensic Engineering Methods and Processes ...................... 1
Joshua B. Kardon, Robert G. Bea, and Robert Brady Williamson

Learning from the Past Experiences of Practicing Engineers ........................................... 12
F. N. Rad and A. M. James

Benchmarking Forensic Engineering Practice—A Philosophical Discussion ................. 22
S. E. Chen, D. Young, D. Weggel, D. Boyajian, J. Gergely, and B. Anderson

Hurricanes, Earthquakes, and Natural Hazards I

Returning Buildings Damaged by Hurricanes or Earthquakes to Pre-Damage Condition ...................................................................................................................... 33
Gary C. Hart, Anurag Jain, and Stephanie A. King

Lessons Learned from Hurricane Katrina ......................................................................... 43
James W. Jordan and Saul L. Paulius

Strategies for Damage Assessments and Emergency Response ........................................ 59
David B. Peraza

Residential Investigations (Practitioner Track)

Investigation into Brick Masonry and Concrete Foundation Wall Distress of a Single-Family Residence ................................................................................................ 67
Timothy J. Dickson

Forensic Investigation of a Patio Failure ............................................................................. 77
Andrew Halter

The Leaking Basement Epidemic—Causes, Cures and Consequences ............................ 84
Stuart Edwards
Forensic Engineering
Proceedings of the Fourth Forensic Engineering Congress, held in
Cleveland, Ohio from October 6-9, 2006

Structures I

John Hancock Center Scaffold Collapse ................................................................. 97
Alec S. Zimmer and Glenn R. Bell

Nonlinear Static Analysis of Reinforced Concrete Residential Structure
with Non-Fixed Connections .................................................................................. 112
José Ramón Arroyo and Drianfel Vazquez

Case Study of Stone Veneer Failure .................................................................... 127
Deepak Ahuja, Stewart M. Verhulst, and Andrew M. Noble III

Geotechnical and Geo-Environmental

Risk Assessment and Treatment in Slope Stability Forensic Engineering ............... 141
Mihail E. Popescu

An Invisible Menace—The Impact of Pyrite Induced Expansive Forces
on Long-Term Building Failure: A Case Study ..................................................... 154
Paul G. Carr, Joseph L. Thesier, and Mark B. Kimball

Restoration of Distressed Secondary Monitoring System at a Hazardous
Waste Landfill ......................................................................................................... 169
J. J. Parsons, J. Lyang, and K. Durnen

Hurricanes, Earthquakes, and Natural Hazards II

Investigation of Damage to a Masonry Condominium Building from the 1994
Northridge Earthquake ......................................................................................... 183
A. Jain, C. C. Simsir, A. P. Dumortier, and G. C. Hart

Guidelines for Determination of Wind versus Water Causation of Hurricane
Damage ..................................................................................................................... 195
James M. Hinckley

South Clear Well Roof Collapse: Hydraulic Uplift or Excessive Construction
Loading? ................................................................................................................... 210
C. Roarty, Jr., J. Sivak, P. Vogel, and K.V. Ramachandran

Colorado Historic Bridge Field Testing

Prowers Bridge Study: Experimental and Analytical Techniques of Wind
Loading Analysis at an Historic Truss Bridge ....................................................... 225
Veronica R. Jacobson, Frederick R. Rutz, and Kevin L. Rens

Analysis and Testing of the Historic Blue River Bridge Subjected to Wind ............. 242
Shohreh Hamedian, Frederick R. Rutz, and Kevin L. Rens
Forensic Engineering
Proceedings of the Fourth Forensic Engineering Congress, held in Cleveland, Ohio from October 6-9, 2006

Wind Load Analysis of a Truss Bridge at Rifle Colorado ................................................ 256
William B. Swigert, Frederick R. Rutz, and Kevin L. Rens

Analysis and Verification Testing of the Historic San Miguel Bridge ............................ 271
Kazwan M. Elias, Fred Rutz, and Kevin L. Rens

Performance of Transportation Facilities

Forensic Investigation of Sections 390103, 390108, 390109, and 390110 of the Ohio SHRP US 23 Test Pavement ................................................................. 286
S. M. Sargand, I. S. Khoury, and J. L. Figueroa

Repair of Harbor Facilities ......................................................................................... 302
Richard A. Mirth

Blast Capacity and Protection of AASHTO Girder Bridges ............................................311
A. K. M. Anwarul Islam and Nur Yazdani

Historical Cases and Education

Environmental Tragedy of Love Canal ....................................................................... 327
Yung-Tse Hung, Paul A. Bosela, and Alicia Saunté Phillips

The Darlington Building Collapse: Modern Engineering and Obsolete Systems .......... 339
Donald Friedman

Learning from Failure: Teaching a Course on Building Performance and Forensic Techniques ................................................................................................... 353
M. Kevin Parfitt

Vibrations

Vibrations of Cable-Stayed Bridges ............................................................................ 364
S. M. Palmquist

Human Induced Vibration Monitoring of a College Football Stadium ......................... 374
Dilip Choudhuri and Prasad Samarajiva

Forensic Engineering of Intolerable Structural Vibrations and Damage from Construction and Industrial Dynamic Sources ............................................ 384
Mark R. Svinkin

90 Feet—The Difference an Avenue Makes: Protection of Existing Historic Structures during Adjacent Construction .......................................................... 399
Keith Kesner, Eric Hammarberg, and Derek Trelstad

Forensic Engineering

American Society of Civil Engineers, 1801 Alexander Bell Drive, Reston, VA 20191 USA
Phone: 1-800-548-ASCE (2723) or 1-703-295-6300 Fax: 1-703-295-6211
Internet: www.pubs.asce.org
Forensic Engineering
Proceedings of the Fourth Forensic Engineering Congress, held in
Cleveland, Ohio from October 6-9, 2006

Structures II

Roof Collapse—A Forensic Analysis Years After ................................................................. 414
W. W. Small and P. G. Swanson

The Kinzua Decoded: The Forensic Investigation of the July 21, 2003 Collapse........ 423
Thomas G. Leech, Robert J. Connor, Eric J. Kaufmann,
and Jonathan McHugh

Wrigley Field: Forensic Investigation and Structural Analysis of the Friendly
Confines..................................................................................................................................... 438
Jonathan E. Lewis, Arne P. Johnson, and Gary J. Klein

A Case Study of Granite Cladding Distress ................................................................. 452
Deepak Ahuja and Matthew D. Oestrike

Structures III

Lateral Strength Evaluation of Existing Oriented Strandboard Wall Sheathing........... 467
Kenneth B. Simons

Performance of a Design-Build Project............................................................................. 476
Ross J. Smith and Rochelle C. Jaffe

Confidence in Expert Opinion: A Structural Engineering View..................................... 489
Gary C. Hart, Ayse Hortacsu, and Stephanie A. King

Bolt Failure at Gable Roof of 42-Story Building .............................................................. 496
William D. Bast and Ken R. Maschke

Nondestructive Evaluation and Repair

Strengthening of Fire Damaged Concrete Joists at a High School............................... 502
Jerome F. Prugar, Scott M. Osowski, and Joshua Brighton

Evaluation of Preserved Materials Reveals Cause of Column Collapse..................... 516
Charles J. Russo and Glenn R. Bell

Structural Evaluation and Repair of Internally Damaged Concrete............................. 531
Ethan C. Dodge and Matthew R. Sherman

Kyoto Protocol Application in Italy: A Renewed Role of IRT for Testing
Buildings ................................................................................................................................. 542
E. Rosina
Forensic Engineering
Proceedings of the Fourth Forensic Engineering Congress, held in Cleveland, Ohio from October 6-9, 2006

Forensics and Design Practices

The Impact of Market Demands on Residential Post-Tensioned Foundation Design: An Ethical Dilemma
Bart B. Barrett, Kerry S. Lee, and Erik L. Nelson

An Update on Problems Associated with Metal-Plate-Connected Wood-Roof Trusses
Leonard J. Morse-Fortier

Roof Collapse: Forensic Uplift Failure Analysis
Erik L. Nelson, Deepak Ahuja, Stewart M. Verhulst, and Erin Criste

Tunnels and Culverts

Claims and Forensic Engineering in Tunneling
Wolfgang Roth and Anthony Stirbys

Investigation and Repairs to Damaged Duck Creek Culvert
Terry M. Sullivan, Jeremiah R. Nichols, Steven J. Smith, Steven Gebler, Honggang Cao, Michael G. Carfagno, and Larry P. DeRoo

Field Comparison of NDE Methods for Tunnel Condition Assessment
Paul A. Bosela, Sathaporn Lek-udom, Satya Mullangi, and Norbert Delatte
