Operating Reservoirs in Changing Conditions

Contents

The California State Water Project—Asset Management and Condition Assessment ............................................................................................................................... 1
   David Roose and David Starks

The Central Valley Operations Office Monthly Spreadsheet Model.................................. 14
   Lloyd E. Peterson and Paul Fujitani

Conflict Resolution in Transboundary Watercourses through Integration of an Operationalised Legal Doctrine with GIS Based Hydrological Modeling .......... 24
   A. Singh and A. K. Gosain

A Daily Time-Step Planning and Operations Model of the American River Watershed ................................................................................................................ ..... 35
   Brian J. Van Lienden, Armin Munévar, Randi Field, and Russ Yaworsky

Dams, Health, and Livelihoods in Africa: Lessons from the Senegal, Suggestions for Ethiopia ............................................................................................................. 45
   Jonathan Lautze and Paul Kirshen

Decision Support System for Managing Conflict in the Upper San Pedro Subwatershed, AZ ................................................................................................................. 60
   Derya Sumer, Gunhui Chung, Holly Richter, and Kevin Lansey

Developing a Conjunctive Nonlinear Model for Inflow Prediction Using Wavelet Transforms and Artificial Neural Networks: A Case Study of Dez Reservoir Dam, Iran ............................................................................................................. 69
   Hossein Mehdikhani, Ahmad Abrishamchi, and Hanieh Khodaei

The Effects of Lake Precipitation and Evaporation on Reservoir Modeling .................. 79
   Michael Robinson and Hugo A. Loáiciga

The Evolution of Water Management for Alamo Dam on the Bill Williams River in Arizona ................................................................................................................. 93
   Joseph B. Evelyn and Andrew Hautzinger

Fraser River Extended Streamflow Prediction System for the Windy Gap Project .............................................................................................................................. 103
   Stanley J. Woodcock, Michael Thiemann, Larry E. Brazil, Esther Vincent, and Andy Pineda

The Freeport Regional Water Project—From Public Conflict to Consent ...................... 111
   Stefanie Brearley and Cecilia Curry
Gate Operation Numerical Modeling Study for Rio Grande Diversion Structure at Albuquerque, New Mexico .................................................................119
   Jungseok Ho, Julie Coonrod, John Stomp, Mark Holstad, and Bruce Thomson

Green River Lake: Pilot Project for Sustainable Rivers................................................. 129
   Wm. Michael Turner and William J. Byron

Hydraulic Valves and Logic Processors on Medium to Small Dams: The Future of Dam Automation ................................................................. 139
   Lisa Cahill

Interagency Coordination for Truckee and Carson River Operations ......................... 143
   J. T. Boyer

The Kaskaskia Watershed: A Case Study on Cooperation, Conflicting Project Purposes, and the Watershed Approach ................................................. 156
   Jackie Taylor and Joan Stemler

Lake Okeechobee Operations by Means of the Water Supply and Environment (WSE) Regulation Schedule ............................................................ 166
   Luis G. Cadavid, Calvin J. Neidrauer, Jayantha T. B. Obeysekera, Everett Ray Santee, Paul Trimble, and Walter Wilcox

Managing Conflict through Conservation: The Lower Colorado River
Multi-Species Conservation Program ................................................................. 176
   W. E. Werner

Model Error Analysis of the CalSim II San Joaquin River Representation .................. 186
   Levi D. Brekke, Randi Field, and Nancy Parker

Most Excellent Integrated Water Management from California .................................. 196
   Jay R. Lund

Multi-Objective Optimization of Folsom Reservoir Operation .................................. 205
   Randi Field and Jay R. Lund

Multiobjective Optimization with HEC Res-PRM—Application to the Upper Mississippi Reservoir System .............................................................. 215
   Beth A. Faber and Julien J. Harou

A New Framework for Water Conflict Resolution .................................................... 225
   George F. McMahon

New Rainfall-Based Management Plan for More Natural Water Deliveries to the Everglades Shark River Slough ......................................................... 234
   Alaa Ali, C. Neidrauer, L. Cadavid, P. Linton, K. Tarboton, and J. Obeysekera

Operation of Tehachapi East Afterbay ..................................................................... 244
   Michael S. Inamine and Terry L. Becker

Optimized Flood Control in the Columbia River Basin for a Global Warming Scenario ......................................................................................... 256
   Se-Yeun Lee, Alan F. Hamlet, Carolyn J. Fitzgerald, Stephen J. Burges, and Dennis P. Lettenmaier
An Overview of the Truckee-Carson RiverWare Modeling System .................................. 272
Shane Coors

Priority-Penalty Derivations for Optimization-Based Simulation Models ....................... 284
I. C. L. Ferreira and J. R. Lund

Rapid Prevention of Disputes in Public Policy and Planning Process .......................... 294
Marcel P. Dulay and Suzanne A. Pierce

Reservoir Operations Management Using a Water Resources Model ............................ 304
Rick Parsons and Ray Bennett

Review of Truckee River Operating Agreement Negotiations and Related Modeling Efforts .................................................. 312
Thomas R. Scott

Simple Forecast-Operations Model Using Hydrologic Persistence in Central Texas ....... 324
David W. Watkins, Jr., Wenge Wei, and Deborah K. Nykanen

Simulating Multi-Reservoir Operation Rules by Network Flow Model ....................... 335
Frederick N.-F. Chou, Chia-Wen Wu, and Cheng-Hao Lin

Source Water Quality Forecasting and Tactical Management of the Los Vaqueros Reservoir .................................................. 345
Kent Nelson, Lucinda Shih, and David Huey

A Spreadsheet-Based Screening Model for Evaluating Alternative Water Management Strategies for Lake Okeechobee, Florida .................................................. 354
Calvin J. Neidrauer, Luis G. Cadavid, Paul J. Trimble, and Jayantha T. B. Obeysekera

Stakeholder Interaction Methods to Present Results of the Truckee-Carson Models ....... 364
Jeffrey Rieker

Stream Flow Forecasting and Reservoir Operation Models Using Fuzzy Inference Systems .................................................. 373
A. Abrishamchi, S. Jamali, M. A. Mariño, and M. Tajrishy

The Sustainable Rivers Project: A Partnership between the Corps of Engineers and The Nature Conservancy .................................................. 383
J. T. Hickey and A. T. Warner

TDG at Lower Monumental Dam for Alternative Spill Operations ................................ 391
Steven C. Wilhelms and Michael L. Schneider

Two-Stage Stochastic Linear Programming Model for Coordinated Multi-Reservoir Operation .................................................. 400
Yongdae Lee, Sheung-Kown Kim, and Ick Hwan Ko

Using Risk-Based Forecasts to Improve Water Supply Reliability ............................ 411
Steven Nebiker

Value of Updating Ensemble Streamflow Prediction in Reservoir Operations ............ 422
