Contents

**TECHNICAL SESSION I:**
Session Chair: Harvey Parker

Activities of the ITA Working Group on Shotcrete Use ......................................................... 1
T. B. Celestino and A. Ishida

Standards, Test Methods, and Guides for Shotcrete Ground Support ............................. 5
Peter C. Tatnall

Recommendation for Shotcreting (Draft) Part “Tunnels by NATM” by the Japan Society of Civil Engineers ............................................................... 14
T. Uomoto and C. Hashimoto

**TECHNICAL SESSION II:**
Session Chair: Stefan Bernard

Bringing Science to an Art: A Decade of Shotcrete Research at the University of British Columbia ................................................................. 30
Nemkumar Banthia and Sidney Mindess

A Decade of Shotcrete Research at Laval University ........................................................... 46
M. Jolin and B. Bissonnette

An Application for Bayesian Statistics for Monitoring the Thickness of Shotcrete Linings ........................................................................................................ 63
Håkan Stille, Mats Holmberg, and Tomas Franzén

Design of Bolt Anchored Reinforced Shotcrete Linings Subjected to Impact Loadings ............................................................................................................. 72
J. Holmgren and A. Ansell

Applicability of Shotcrete for NATM Using Blast Furnace Slag Cement ........................ 89
S. Yoshida, F. Taguchi, S. Yamanaka, and H. Sato

Behaviour of Concrete Panels Reinforced with Welded Wire Mesh and Fibres under Impact Loading ................................................................. 99
Hanfeng Xu and Sidney Mindess

Shotcrete with High Strength at Early Age ........................................................................ 110
A. Ishida

**TECHNICAL SESSION III:**
Session Chair: Peter Tatnall and David Wood

High Dosages of Set Accelerator in Fibre Reinforced Shotcrete ....................................... 120
E. S. Bernard, O. Jerlin, and K. Lönnésjö

Deformation of Round Determinate Panels Containing Fibres ........................................... 138
Hanfeng Xu, Qian Gu, and Sidney Mindess
Shotcrete for Underground Support X

Strength and Deformability Anisotropy of Fiber-Reinforced Shotcrete .................................. 150
T. B. Celestino, G. R. de Castro, P. Vessaro, A. A. Bortolucci,
and O. J. Santos

Fiber Reinforced Shotcrete: The Effect of Spraying Process ............................................. 158
Vivek Bindiganavile and Nemkumar Banthia

The Influence of Curing on the Mechanical Performance of Fibre Reinforced
Shotcrete .............................................................................................................................. 176
E. S. Bernard

Behaviour and Performance of Monofilament Macro-Synthetic Fibres
in Dry-Mix Shotcrete ........................................................................................................... 194
Jean-François Dufour, Jean-François Trottier, and Dean Forgeron

Application of High Performance Fibre Reinforced Shotcrete for Tunnel
Primary Support .................................................................................................................. 206
M. Skazlic, Z. Skazlic, and J. Majer

Steel Versus Synthetic Fibre Reinforcement in Shotcrete .................................................. 215
R. Ratcliffe

TECHNICAL SESSION IV:
Session Chair: George Yoggy

Shotcrete under Squeezing Rock Conditions during the Construction of the
Multifunctional Station Faido of the Gotthard Base Tunnel ............................................ 228
Daniel Spörri and Gustav Bracher

Beacon Hill Station Shotcrete Application ........................................................................ 244
J. Laubbichler, S. Redmond, and Z. Varley

Shotcrete Support for the Seymour Shaft and Shaftbase TBM Launch
Chamber Seymour Capilano Twin Tunnels Project, Vancouver, BC ................................ 258
Dean Brox, Christian Genschel, Josef Messner, Andy Saltis,
and Tom Morrison

Seismic Retrofit of a Concrete Immersed Tube Tunnel with Reinforced Shotcrete ...... 270
D. R. Morgan, K. Kazakoff, and H. Ibrahim

Thermal Barriers and Fibre Concrete Roles in the Passive Fire Protection of
Tunnels ................................................................................................................................. 285
Tom Melbye and Ross Dimmock

TECHNICAL SESSION V:
Session Chair: Thomas Melbye

Wet-Mix Shotcrete as a Material, Process, and Ground Control Component
of a 21st Century Underground Mining Operation ......................................................... 298
Brad W. Knight, Michael Rispin, and Ian Clegg

SCC for Underground Sprayed Concrete Application ...................................................... 307
Dan Millette, Micheal Lessard, Francois Vezina, Alain Tremblay,
and Jean-Claude Leduc

Shotcrete for Underground Support X
American Society of Civil Engineering, 1801 Alexander Bell Drive, Reston, VA 20191 USA
Phone: 1-800-548-ASCE (2723) or 1-703-295-6300 Fax: 1-703-295-6211 Internet: www.pubs.asce.org
Shotcrete for Underground Support X

Design, Testing, and Implementation of ‘In-Cycle’ Shotcrete in the Northern 3500 Orebody
D. O’Toole and S. Pope

In Cycle Shotcrete Application in Development Activity of DOZ Mine, Pt. Freeport Indonesia
Glenn Rotty and Sabar Parningotan

TECHNICAL SESSION VI:
Session Chair: Tarcisio Celestino

Pumping Concrete: A Fundamental and Practical Approach
M. Jolin, F. Chapdelaine, F. Gagnon, and D. Beaupré

Lessons Learned from a Successful Shotcrete Repair
Paul D. Carter and Jim Wong

The Advantages of Using Preblended Dry Materials for Wet-Mix Shotcrete in North America
Mike Ballou and Mark Lukkarila

Computer Controlled Application of Shotcrete: A Status Report
K. F. Garshol and C. Ziegler
